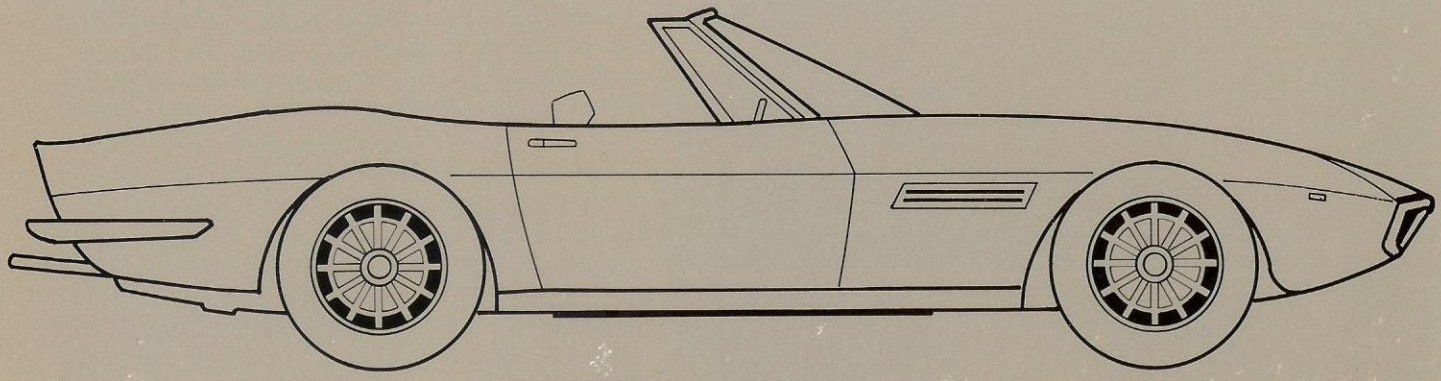
INTO AN EXTRAORDINARY MASERATI SPYDER



IT'S EASY WITH THE NEW CONVERSION KIT FROM J/P LIMITED

J/P Limited is pleased to introduce a conversion kit for the Maserati Ghibli coupe. This kit makes it easy to convert your Maserati Ghibli coupe into an extraordinary Maserati Spyder.

THE CAR OF YOUR DREAMS FOR A FRACTION OF THE COST

As you probably know, an original Maserati Spyder sells today for approximately $200,000 or more. Even if cost is no object, there is a limited supply. Only 125 Maserati Spyders were built and only approximately 75 of those were sold in the U.S. If you've always dreamed of owning a Maserati Spyder, but haven't been able to buy an original, don't despair. Our conversion kit is an easy and economical way to make your dreams come true.

COMPLETE, EASY-TO-INSTALL KIT

Our kit contains everything you need to create the car of your dreams. There is nothing else to buy as you can see from the following parts list. The kit also comes with a detailed instruction manual, complete with illustrations to make installation as simple as possible. In fact, our kit is so easy to install that after approximately 160 hours of labor, your coupe will look identical to an original Spyder—for a fraction of the cost.

A SOUND INVESTMENT

By using our conversion kit to turn your Ghibli coupe into a Spyder, you'll not only be creating the car of your dreams, you'll be making a sound investment. Since the summer of 1987, the value of the Ghibli Spyder has increased more than eight times. Today, a converted Maserati Ghibli coupe should sell for approximately half the price of an original Maserati Spyder. And, if the converted Maserati coupe follows the same trend as the Daytona Spyder, it should soon be worth as much as, or more than, an original.

This converted Maserati Ghibli coup[illegible]as a trophy winner at the Exotic Car Show, King[illegible]russia, Pa., July 8, 1988.
